EDUCATION

2017-2019

Master of IT, Major in Architecture and application of information systems, ENSA

2014-2017

Bachelor of IT, Major in Mathematics and Computer, FST

SKILLS

- Systems architecture and design
- API design and development
- Web Design
- Agile methodology
- Scripting languages
- Application Development framework
- Problem-Solving
- Documentation and UMLs
- Project Management Tools
- Strong Communication

C E R T I F I C A T I O N S

- MEAN Stack
- Angular 18, Node.js The MEAN Stack Guide
- AWS Cloud Foundations
- Python
- NSE 4 FortiGate Security
- CYBEROPS Associate

SUMMARY

Passionate software developer with hands-on experience in web application development and software engineering. Committed to delivering innovative solutions, I thrive in collaborative environments and am eager to contribute to impactful projects. Enthusiastic about staying at the forefront of technology trends to drive continuous improvement.

WORK HISTORY

Software Enginner

august 2023 – January 2025

ZIWIG, RABAT

I developed and enhanced features for multiple software applications, improving their user-friendliness and intuitiveness by 18%. My responsibilities also included refactoring existing code to significantly boost application performance, scalability, and reliability. Additionally, I actively participated in design and code reviews, collaborating effectively with other engineers and stakeholders, which contributed to a more streamlined development process and enhanced the overall quality of our software solutions.

SOFTWARE ENGINNER

October 2021- august 2023

FyComputing, RABAT

I led the development of several software packages, which were designed for use across different teams, significantly enhancing collaboration and operational efficiency. Throughout this process, I also acquired specialized skills in **Loopback**, particularly in implementing **Keycloak** for robust identity and access management solutions.

SOFTWARE DEVELOPER

Avril 2019- October 2021

INNOVEOS, RABAT

I contributed to the development of a web application aimed at improving tourism audits, primarily utilizing the **MEAN Stack** for modeling and design tasks.
